FINANCIAL SOLUTIONS

ETHIX 360

A Superior Reporting Solution!

The financial services industry requires the effective management and utilisation of data in a way that provides clear outputs that can be analysed and used to improve the business. Employees throughout the organization must be able to generate clear reports easily and in a timely manner without requiring technical expertise. ETHIX 360º empowers business users, allowing them to extract data based on parameters that can be easily modified to meet Central Bank requirements.

Your Analytical Toolbox

ETHIX-360º is designed to provide banks and financial institutions with a holistic view of its customers, their banking activities, and what they want. As a valuable processing tool, it facilitates the identification of portable customers, recognises marketable products and services, and supports operational excellence. The ETHIX 360º is a highly scalable, easy to use tool that offers total flexibility in data analysis.

Packed
Full of Features

Stand-alone database (BO)

Provides a data entry application that helps to de¬fine the format of the Balance Sheet and Income Statement

Report data can be exported in Excel, CSV, PDF, and TXT format

Information can be stored for future analysis

Security permissions are on the report level

Can build one Universe that incorporates objects from multiple databases

Operates from a server so that it is not required to install for each separate customer

Ability to build an intermediate layer (universe) that can used by business users to build reports without the need for a technical background

Export built-in audit reports

Can connect to all types of databases

Fully web-based mechanism

Robust user, groups and privileges security through Platform Administration

Create & modify reports offline that can be published on the server

Create dashboards

Generate high-level reports covering banking products, sales trends, exceptions, highlights and low-lights, product returns and performance trends on a month-to-date, quarter – to-date, midyear-to-date and year-to-date basis

Schedule reports to run at a specific time and send to users by email on a shared folder on the FTP site

Specify auditing events through the Auditing Module

Discover operational or product-based conclusions simply and easily

Monitor critical variables including deposits, loans, General Ledger and gross margin return on investment
